\$900 & more

Our team has extensive experience in coding in PHP/MySQL and are comfortable with Javascript and JQuery plugins. We also frequently develop for Wordpress / Joomla, HTML/CSS, etc.

You can see a sample of our work at: <http://micro-comp.com/design-and-development>. Additionally, a great portion of our work is on complicated systems developed for clients that already have pre-existing systems who need detailed and intricate work done on specific portions of a page or script.

For more info, call Hayk Petrosyan at 818-794-9109. Our office, located in Glendale, CA, has been successfully serving clients throughout California and neighboring states for several years.

TESTIMONIALS

"MicroComp created my business web page with a database and search function. Hayk was always available to discuss the web page to make sure it was being built to my requirements. He put together a very high end project for an excellent price that far exceeded my expectations. I highly recommend him and his company. Please contact me with any questions." **Greg Choate, Law Office of Greg Choate**

"I have worked with MicroComp's team and find them to be incredibly professional, reliable, and affordable. Their customer service is excellent and they deliver on time and on budget. I look forward to a continued relationship with MicroComp." **Jedd Gold, Artisan Kitchens**
